Use a Type 2 Bay Servo master cylinder
GSF part number 65232
If you have CSP Disc brakes you
will already have this master cylinder.

You will have to make a brake line up with 3/8" unf fitting to go into the servo but with a metric fitting at the other end to go into your T peice

Vacuum feed through 10mm nylon airline to vacuum outlet on engines inlet manifold. We can supply a 1/4" BSP threaded Hose tail if you need one.
